

Platoon Tail Bag Mounting Instructions

Step 1: Study your bike's possible mounting points. This bike has a convenient metal mounting boss on both sides of the tail section. Unfold the velcro flap on the side and expose the bungee straps.

Step 2: Run the bungee around the mounting boss and back to plastic D-ring.

Step 3: Repeat step 2 for the other side.

Step 4: Pull bungee strap to a secure mounting point on the chassis. On most bikes, there is a convenient hook on the passenger peg as in this photo. If your bike has a forward mounting boss (like on a Honda VFR), run bungee around the boss and back to the plastic D-ring as we did in step 2.

Step 5: Repeat step 4 for the other side.
